a rocky hill, you will catch sight of the lakes of Pietra Rossa (2585 m). The return journey follows that of the outward route but from the lakes it is possible to reach, in a short time, the Passo di Val di Canè (2674 m) from where you can glimpse the Val Grande. From here the most expert hikers can continue in a loop, with some stretches exposed, which takes you to Cime di Pietra Rossa, and to Cima Monticello and from here descend to Valzaroten.

VAL GRANDE

DEPARTURE POINT: DISTRICT OF TÙ

- DISTANCE **20,7 km**
- ALTITUDE DIFFERENCE **+/- 1150 m**
- ESTIMATED TIME **6h30**
- SEASON **june/october**
- DIFFICULTY **Medium**

The Val Grande with its numerous huts which are dotted across the pastureland on the valley floor, is one of the most fascinating and faunistic in the Stelvio National Park.

From Cascatelle (1145 m) take the muletrack to the right, which leads to the village of Tù, and from here the asphalted road to Plasacù. Continuing along the road you will reach a bridge in Acqua Calda and from here continue through the woods until reaching Scudeler. Having crossed the torrent, a further ascent through the woods leads to Caret, where, by leaving the deviation to the right which goes to the cappella di Caret, you carry on flanking the torrent up to the malga Val Grande (1790 m). From here, crossing the fields and the bushes you will

reach Plaz de l'Asen (2040 m) where the encampment dedicated to Saverio Occhi is situated. To return you can repeat the outward journey or alternatively take the more demanding and difficult Sentiero dell'Asino, which crosses the right side of the valley and reaches Rigucc, from here it is possible to return to the departure point by following the path to the left.

PIANA DEI MOREI

DEPARTURE POINT: DISTRICT OF STADOLINA (VIONE)

An excursion in Val Paghera and the discovery of Piana dei Morei: a panoramic balcony which bears witness to the Great War.

From the houses in Vallaro (1067 m) ascend the road to the south to Val Paghera. By diverting to the left and then to the right it is possible to reach some fortifications dating back to the Great War. Continuing on the main road (without diverting) you will arrive to the houses in Paghera, from where you take the CAI 672 for a brief stretch and then continue south. After the bridge over the Vallaro Torrent continue straight (do not divert to the left) towards the extremity of the valley, here the road becomes a muletrack. At the end of this, turn right and ascend steeply to Malga Laghetto, continue on to Piana dei Morei, where,

ascending the military placements you will reach Cresta dei Salì. To return follow the military path and then the old Pornina road until reaching Le Rive. Having crossed the River Oglio you return to the houses in Vallaro by way of the pedestrian/cycle path.

SENTIERO DEI CERVI

DEPARTURE POINT: SPORTS FIELD

A very pleasant loop trail following the CAI 171, which rotates around the faunistic oasis of the Altopiano Mola-Dosso Toricla.

From Monno take the dirt road which descends from Santèl to the bridge on the Valle del Mortirolo (here you can see the remains of an old saw-mill) and then reascend to the crossroads in Fracai. By taking the dirt road to the left you cross the Ogliolo torrent and go up through the woods to Paghera di Sopra. At the sharp bend below continue to the right on a muletrack where you will reach and pass the Edolo-Mola road (via di Lares). After a short stretch of flat dirt road you ascend the path to Dosso Toricla. This is a location of archeological, historical and naturalistic importance and is particularly enhanced by large

numbers of deers. From here descend in a westerly direction towards Mola. Once you reach the church dedicated to Beato Don Gnocchi, a short stretch of road, initially asphalted and then (diverting to the left) a dirt road will lead you to a characteristic stronghold with a drinking fountain. At the junction follow the path to the right and descend until you pass the Val Dorena and the vast pastureland of Savena and return to the point of departure.

One of the most fascinating routes within the Adamello Park.

From Pozzolo (1550 m) reachable by car from Edolo, take the 634 which reaches a second picnic area, ignoring the 672 to the left, ascend to the right through the woods. Having crossed the beautiful Foppa you go beyond a steep channel and you will reach the signposted junction to Monte Aviole. From here the trail becomes more difficult and demanding; ledges and small gorges and some icy patches and snow residue make it useful to be equipped with a snow pick and crampons. Some of the stretch is easier but nevertheless exposed. Finally you will reach the summit. The panorama here is extraordinary, stretching from the nearby frozen bastions to the

distant Monte Rosa. Descend once again at the junction and turning left you reach the dorsal of M. Foppa - M.Colmo (attention here as the rocks can be slippery), up to rifugio Malga Stain. Continuing west you cross the exceptional balcony adjacent to the rifugio and enter the woods, after a short time you will be back to the departure point.

This route, of great historical and naturalistic interest, uncovers the military built at an altitude of 3000 m. Retrace the ways that the Alpini used during the First World War, to connect the placements built along the crest of Castellaccio-Pisgana.

at Lago Scuro and to Corno di Lago Scuro (3165 m). The path, whose name should not deceive you, crosses exposed ledges and disconnected channels with a continuation of steps and gangways. Having reached the Gendarme, there is the possibility to cross the suspended gangways or alternatively, equipped with a torch, to pass through a long tunnel. The path reaches Passo Castellaccio (2963 m) and descends along the east of the valley to the Laghetti di Monticello and the Cabinovia Paradiso station.

The itinerary departs from the arrival of the Gondola Presena and follows the route to Lago Scuro, where there is a military village dating back to the Great War, with a small church and with recently reconstructed barracks now used as a museum. Climbing the long stone trail north, you will arrive at Capanna Amici

Panoramic equipped route, retracing the daring military trenches built on the border between Italy and the Austro-Hungarian Empire, along the Lago Scuro and Payer passes.

This is considered the normal progression towards the Sentiero dei Fiori. From Rifugio Mandron ascend the steep crag to Lago Scuro. Close to the upper margin of this austere basin there is a junction; taking the path to the left, over some rocky hills and through some rubble and debris, you will reach Passo Payer. The scene which presents itself here is one of granite tectonic plates, vertical stretches of land, sharp crests and exposed passes, all of which must be confronted with great care. From Cima Payer continue along the ledge, between wooden gangways and rocky

steps until arriving at Passo di Lago Scuro and the military village of the same name. After the Pass, coast alongside the slopes on the south side of the Corno di Lago Scuro up to the intersection with the SAT 209 from where you will return to Rifugio Mandron.

A very interesting route along the placements from the Great War, offering spectacular views of the Presanella, Adamello and Ortles-Cevedale groups.

From Malga Valbiolo take the SAT 111/161 which reaches the peak of Monte Tonale Orientale. This is the starting point of this trail: a series of Austro-Hungarian placements right up to Torrione D'Albiolo. This trail is initially undemanding but becomes more difficult continuing on. The path is scattered with war remains and relics and going towards Torrione, you can see flights of steps made of cement, artillery placements, tunnels and traces of the arrival point of a cableway. From the summit you descend west to the fork in direction of Valle di Pezzo.

From here continue on towards Passo dei Contrabbandieri on an equipped path (the Sentiero degli Alpini, where there are some stretches without safety chains) or alternatively the easier Sentiero dei Laghi across the junction to Montozzo and Rifugio Bozzi. Arriving at the pass, follow the 111 to return to Malga Valbiolo.

The last suggestion

This brochure gives you ideas about some wonderful mountain adventures, but we are sure a map will be useful along the paths. Ask for it at the tourist boards and info points: it is easy to recognize, as it has the same cover of this brochure. It will follow you along all the trails you decide to try.

Have a nice walk!
